## Summary

Motivated cloud-native Information Security Professional with a passion for exceeding customer expectations. Expertise in a wide range of cloud platform and Kubernetes security technologies with a track record of producing extraordinary results and fostering long-lasting customer relationships. Energetic self-starter with excellent analytical, organizational, and communication skills.

## Experience

- |  |              |
|--|--------------|
| <b>Advisory Board Member</b> , Darkbit.io  | 2021-present |
| <ul style="list-style-type: none"><li>• Provide technical and strategic guidance in support of Darkbit's ongoing development of world-class cloud security posture management tools and service offerings.</li></ul>   |              |
| <b>Co-founder, Chief Architect</b> , Darkbit.io  | 2019-2021    |
| <ul style="list-style-type: none"><li>• Provided expert technical and strategic guidance to cloud-native organizations by assessing the security posture of their AWS, GCP, and Kubernetes environments via point-in-time and continuous security configuration assessments.</li><li>• Co-developed and open-sourced <u>OpenCSPM</u>, a graph-database engine for efficiently assessing the security posture of AWS, Google Cloud, and Kubernetes resources.</li></ul>   |              |
| <b>Professional Services Consultant (Contractor/TVC)</b> , Google Cloud  | 2018-2019    |
| <ul style="list-style-type: none"><li>• Engaged with multiple clients migrating to Google Cloud and Google Kubernetes Engine (GKE) securely. Performed security configuration reviews and provided strategic security guidance to client management.</li><li>• Delivered multiple internal GKE Security educational assets and training sessions used by the greater partner ecosystem.</li><li>• One of the first 20 to qualify for the Google Cloud Certified Fellow Program.</li></ul>  |              |
| <b>Independent Security Consultant</b> , Bradley Geesaman Consulting   | 2018-2019    |
| <ul style="list-style-type: none"><li>• Delivered practical security guidance, expertise, implementation assistance, and security training to several clients deploying mission-critical workloads inside Kubernetes on Baremetal, AWS, and GKE.</li><li>• Designed, developed, and automated the cluster and deployment pipelines of a multi-team AWS/Kubernetes-based platform capable of processing and performing security analytics at 60K logs/sec into Elasticsearch.</li></ul>   |              |
| <b>Senior Manager</b> , Symantec Corporation   | 2015-2017    |
| <ul style="list-style-type: none"><li>• Led the team that successfully hosted a one-week, 1500 person, company-wide Capture-the-Flag event inside 10 AWS regions on top of multiple, hardened Kubernetes clusters.</li><li>• Architected and built a fully automated Kubernetes cluster deployment tool on AWS to support the Docker workloads driven by the Symantec Cyberskills platform.</li><li>• Built and managed the federated logging and performance system used to monitor cluster and container health using EFK and Prometheus/Grafana.</li></ul>  |              |
| <b>CTO</b> , Blackfin Security Group - Acquired by Symantec Corporation  | 2014-2015    |
| <ul style="list-style-type: none"><li>• Led the technical operations team focused on delivering cutting-edge, realistic, and immersive training solutions to improve security awareness for large organizations and "hands-on" experience to expert security personnel charged with defending their data.</li><li>• Managed the Customer Support, Operations, and Internal IT teams.</li><li>• Administered The Hacker Academy, an ethical hacking subscription learning platform on top of AWS via Infrastructure as Code and Configuration Management.</li></ul>   |              |
| <b>Chief Architect</b> , MAD Security  | 2012-2014    |
| <ul style="list-style-type: none"><li>• Led and managed the team that designed, built, and delivered capture-the-flag (CTF) style ethical hacking/cyber wargames challenges for security professionals looking to keep their skills sharp. These challenge scenarios have been played by over 9000 security professionals around the world in over 200 events lasting 2 hours to 30 days (24/7).</li><li>• Delivered several one-day bootcamp instructional training sessions covering security penetration-testing basic concepts complete with custom CTF scenarios for hands-on skills reinforcement.</li></ul> |              |

<b>Security/Sales Engineer</b> , Check Point Software Technologies	2008-2012
<ul style="list-style-type: none"> <li>Responsible for technical pre-sales support for the design, migration/implementation, and operation of security gateway solutions for Federal Civilian Agencies.</li> <li>"2009 North American Security Engineer of the Year" Award for outstanding team performance and customer satisfaction.</li> </ul>	
<b>Manager, Assessment Services</b> , Securicon	2006-2008
<ul style="list-style-type: none"> <li>Managed numerous security assessments from kick-off to final delivery for financial, power/energy, and gas pipeline companies. Led small teams in electronic and physical penetration testing, vulnerability assessments, and solutions design and review.</li> <li>Formalized and streamlined the client engagement assessment data collection process to reduce final deliverable draft and completion time by up to 50%, improving profit margins on numerous fixed-price contracts.</li> </ul>	
<b>Principal Security Engineer</b> , Symantec Corporation	2004-2006
<ul style="list-style-type: none"> <li>Provided Tier3 support to worldwide SOC Engineering teams in support of Fortune 500 customers.</li> <li>Designed, developed, and implemented the improved fault and performance monitoring system internally recognized for reducing 5% of all daily engineering workload.</li> </ul>	
<b>Security Engineer/Senior Security Engineer</b> , Symantec Corporation	2003-2004
<ul style="list-style-type: none"> <li>Responsible for supporting Symantec's Managed Security Services (MSS) customer base from a 24x7x365 Security Operations Center as a senior member of the Security Engineering Team.</li> <li>Provided outstanding engineering maintenance, configuration, and support of all leading firewalls and IDS systems.</li> </ul>	
<b>Systems Engineer</b> , PEC Solutions	2002-2003
<ul style="list-style-type: none"> <li>Responsible for the secure transmission of electronic fingerprints and personnel photos to support Federal hiring processes at remote sites across the US.</li> <li>Received multiple internal performance-based awards.</li> </ul>
